

RETICLE FC-DM

First Focal Plane

NIGHTFORCE®

Available in:
ATACR 1-8x24 F1

Exceptionally fast and precise
Daylight visible illumination

Red indicates illuminated portion of reticle.

Applications:
Close Quarters Engagement | Hunting |
General Shooting | Competition

RETICLE FC-DM

Designed to meet the needs of today's discriminating carbine shooter.

The first focal plane FC-DM reticle is optimized specifically for low power variable rifle scope use. At low power, the daylight bright center dot and segmented circle are visible under the brightest of conditions, allowing for fast and accurate target acquisition.

The clean .5 and 1 Mil-radian (Mil) markings provide easy hold points for moving targets, wind and elevation hold-offs, or for reference markings. For more precise engagements and use at longer ranges, the additional features of the reticle provide fast and easy elevation and windage holds. The FC-DM incorporates reference dots spaced every 1 Mil down to 10 Mills, allowing for easy hold-offs and shot corrections.

Designed specifically for the ATACR 1-8x24 F1 rifle scope, this reticle is perfectly suited for most any shooting application including close quarters, hunting, competition, and general shooting.

Available in the ATACR 1-8x24 F1 rifle scope.

Reticle Subtensions

A	.35 mil
B	2 mil
C	10 mil
D	1 mil
E	5 mil
F	2 mil
G	.06 mil
H	1 mil
I	.5 mil

- Available in the Nightforce® ATACR™ 1-8x24 F1 rifle scope.
- Allows rapid target acquisition in all environments.
- The 10 Mil-Radian grid allows for precise holds within the reticle.
- Daylight visible illuminated center aiming area.
