

# RETICLENP-1™

**NIGHTFORCE®**

**Available in:**

Nightforce 1-4x, 2.5-10x and 5.5-22x NXS riflescopes

Unobstructed view of target at all ranges

Quick target acquisition

Uncluttered and precise

*Red indicates illuminated portion of reticle*

**Applications:**

Big game and small game hunting

*Above: Christine Beck of Extreme Outer Limits TV chose Nightforce riflescopes for her successful African safari. Obviously, it was a wise choice.*

# RETICLE NP-1™

We designed the Nightforce NP-1™ reticle to give the big-game hunter every advantage in the field.

We've eliminated the heavy duplex posts found in many ordinary hunting reticles that obstruct your view and distract from the target.

The heavier horizontal and vertical lines at the three, six and nine o'clock positions quickly direct your eye to the center of the reticle and onto the target, while the finer crosshairs provide precise shot placement on both large and small targets.

The result is a simple, extremely fast reticle with superb performance in virtually any hunting environment. Its clean, open design makes it easy to follow running game. It excels at low magnifications in close quarters on dangerous game, especially when illumination is turned on to a brighter setting, when quick, accurate response can be a lifesaver.

The NP-1 is equally adept at placing precise shots at long distances, making it one of the most versatile reticle designs on the market, suitable for any big game, anywhere in the world.

- Exceptionally fast target acquisition
- Uncluttered design allows full view of target
- Illumination standard

## Reticle subtenions

	4X	10X	22X
A	12 MOA	5 MOA	4 MOA
B	12 MOA	5 MOA	4 MOA
C	12 MOA	5 MOA	5 MOA
D	LINE THICKNESS: .30 MOA	.13 MOA	.08 MOA
E	LINE THICKNESS: 2 MOA	.75 MOA	.25 MOA

## Ranging usage

Riflescope	Power setting
1-4X	4X
2.5-10X	10X
5.5-22X	22X

Accurate rangefinding is possible only at the power settings shown above.

*Speed kills. Just ask Brice Folden of Canada's Wild TV network, who didn't have time for cumbersome riflescopes or reticles while taking this fine sika stag in the rugged mountains of New Zealand. Brice dropped his stag using a Nightforce 2.5-10 x 32 NXS Compact.*
