

WEDGE PRISM

When shooting at extreme ranges, many shooters find their riflescope lacks the necessary elevation travel. The Nightforce Wedge Prism is offered in 2 variants, 50 MOA or 100 MOA, that install forward of the riflescope to increase the effective elevation travel. The Wedge Prism optically shifts the incoming image to the riflescope by a precise elevation value, which directly adds to the available elevation travel within the riflescope.

Key Features:

- 50 MOA/14.5 MRAD or 100 MOA/29.1 MRAD elevation shift variants available for extreme long-range use
- Quick Detach MIL-STD 1913 attachment ensures consistent elevation shift when installed in the field
- Compatible with all brands of riflescopes
- Exact elevation shift measured for each unit and engraved for reference in the field

Includes: MOLLE padded carry case, flip cap lens cover, lens cleaning cloth.

Specifications:

Optical Shift	50 MOA / 14.5 MRAD* 100 MOA / 29.1 MRAD*
Length (excluding lever)	1.8 in / 46 mm
Width	2.7 in / 69 mm
Height	3.3 in / 38 mm
Glass Centerline	1.5 in / 38 mm
Weight	9.2 oz / 262 g (100 MOA) 9.5 oz / 268 g (50 MOA)
Mounting System	MIL-STD 1913 (1.5in / 3 slots)

Part #	Product Description	UPC #	Retail Price
A540	Wedge Prism 50MOA/14.5MRAD Additional Elevation	847362017914	\$990
A541	Wedge Prism 100MOA/29MRAD Additional Elevation	847362017921	\$990

* The listed optical shift is a nominal value. The actual shift varies slightly and is measured and engraved on each unit.
